### System Requirements

#### WordPress Requirements

- WordPress 5.0 or higher
- PHP 7.4 or higher
- MySQL 5.6 or higher
- Active internet connection for license validation

#### Browser Compatibility

- Chrome 80+
- Firefox 75+
- Safari 13+
- Edge 80+

### Installation Steps

#### Step 1: Download the Plugin

1. Access your SiteOverlay Pro account dashboard
2. Download the latest plugin file: **siteoverlay-pro.zip**
3. Save the file to your computer

#### Step 2: Upload to WordPress

1. Log in to your WordPress admin dashboard

2. Navigate to **Plugins > Add New**
3. Click **Upload Plugin**
4. Choose the **siteoverlay-pro.zip** file
5. Click **Install Now**
6. Click **Activate Plugin**

### **Step 3: Verify Installation**

1. Look for "SiteOverlay Pro" in your WordPress admin menu
2. You should see the plugin listed in **Plugins > Installed Plugins**
3. Status should show "Active"

### **License Activation**

#### **Activating Your License**

1. Navigate to **SiteOverlay Pro** in your WordPress admin menu
2. Click on the **License** tab
3. Enter your license key (received via email)
4. Click **Activate License**
5. Wait for confirmation message: "License activated successfully"

#### **Trial License**

- New users can request a 7-day free trial
- Click **Request Trial** on the license page
- Enter your email address
- Check your email for trial license key

#### **License Status Indicators**

-  **Active:** License is valid and working
-  **Trial:** Using trial version (7 days remaining)
-  **Expired:** License needs renewal
-  **Invalid:** License key not recognized

## Basic Usage

### Creating Your First Overlay

1. Edit any page or post
2. Scroll down to the **SiteOverlay Pro** meta box
3. Toggle **Enable Overlay** to ON
4. Configure your overlay settings:
  - **Title:** Main headline text
  - **Subtitle:** Supporting text
  - **Button Text:** Call-to-action button
  - **Button URL:** Where button links to
  - **Display Delay:** When overlay appears (seconds)

### Overlay Display Options

- **Immediate:** Shows as soon as page loads
- **Timed Delay:** Shows after specified seconds
- **Scroll Trigger:** Shows when user scrolls percentage
- **Exit Intent:** Shows when user tries to leave page

### Styling Options

- **Template:** Choose from pre-designed layouts
- **Colors:** Customize background and text colors
- **Fonts:** Select typography options
- **Animation:** Choose entrance/exit effects

## **Troubleshooting**

### **Common Issues**

#### **Overlay Not Displaying**

##### **Possible Causes:**

- License not activated
- Overlay disabled on page
- JavaScript conflicts
- Caching issues

##### **Solutions:**

1. Verify license is active in settings
2. Check overlay is enabled in page meta box
3. Test with default WordPress theme
4. Clear all caching plugins

#### **License Validation Fails**

##### **Possible Causes:**

- Invalid license key
- Network connectivity issues

- Server firewall blocking requests

**Solutions:**

1. Double-check license key for typos
2. Verify internet connection is working
3. Contact hosting provider about firewall settings
4. Try deactivating/reactivating plugin

**Content Not Updating****Possible Causes:**

- Caching enabled
- API connection issues
- Browser cache

**Solutions:**

1. Clear WordPress cache
2. Clear browser cache
3. Check API health status in settings
4. Wait 5 minutes and refresh page

**Performance Optimization****Speed Optimization**

- Overlays load asynchronously
- Content is cached locally
- Minimal impact on page load times
